Quarter sized hail fell between Mullin and Zephyr.

LAMPASAS COUNTY --- 4.0 S LAMETA [31.16, -98.38]

A complex of thunderstorms developed between San Angelo and Goldthwaite. This complex of storms eventually moved to the southeast towards the Austin and San Antonio areas. One storm on the northern end of the complex produced quarter sized hail in Mills County.

Lightning was believed to have started a house fire in the Quail Valley mobile home park north of Palestine. The single wide mobile home was a complete loss.

A surface low and an associated dryline remained over North Texas from the 29th through the early morning hours of the 31st. Several rounds of severe storms developed and moved across North Texas due to a very unstable atmosphere across the area. The main areas affected were the northern and northwestern areas of the County Warning Area. Hail up to the size of golfballs and wind gusts up to 70 MPH were reported from these storms.
